EXPERIENCE

Gunnison County Assessor's Office – *Data Analyst*

Gunnison, CO | July 2025 - current

- Developed and optimized SQL queries in SQL Server Management Studio and Access to extract, transform, and deliver property and assessment data.
- Performed data validation, QA, and integrity checks across large property datasets to ensure accuracy for statutory reporting and public use.
- Supported production of state-mandated deliverables (e.g., valuations, tax rolls, assessment abstracts) through data processing and verification workflows.
- Queried and analyzed real estate and sales data to identify discrepancies, validate records, and support appraisal processes.
- Fulfilled complex data requests by aggregating, filtering, and interpreting multi-source datasets for stakeholders and public users.
- Collaborated cross-functionally to troubleshoot data issues, improve reporting accuracy, and meet strict regulatory deadlines.

MedAware Systems – *Data Analyst*

Boulder, CO/Remote | Jan 2015 - Jan 2021

- Conducted literature reviews and interpreted medical data accurately.
- Developed search strategies and criteria for optimized database research.
- Analyzed data and maintained key datasets for business needs.
- Monitored metrics, identified changes, and suggested improvements.
- Collaborated with clients to define research needs and strategies.
- Presented findings to educate team and enhance organizational knowledge.
- Conducted data validation, QA, and public-facing communication for clinical research tools.

EDUCATION

Western State Colorado University – *Bachelor of Arts in Biology*

Gunnison, CO

Certifications

- Google Data Analytics Professional Certificate
- Google AI Essentials Certificate

SKILLS

- **Programming & Data Analysis:** Python, SQL, SAS, RStudio, PostGIS
- **Data Cleaning & Preparation:** Data wrangling, ETL processes
- **Data Visualization:** Power BI, Tableau, Microsoft Excel
- **Version Control:** GitHub
- **Web Development:** HTML/CSS, JavaScript, API Integration, MapLibre GL JS, Docker, GIS/Spatial Data

SELECTED DATA & SOFTWARE PROJECTS

- **Gunnison County Assessor Map Platform | Live Application | GitHub**
 - Built and deployed a full-stack GIS platform enabling nontechnical users to upload data, configure interactive maps, and join Excel or CSV records to parcel geometries without GIS software.
 - Integrated wildfire detections updated every 30 minutes and developed reusable layer-management, styling, and multi-map configuration tools.
 - Deployed the platform using Docker, nginx, PostgreSQL/PostGIS, firewall protection, and automated database backups.
 - Technologies: React, TypeScript, Node.js, MapLibre GL JS, PostgreSQL/PostGIS, OGC APIs, Docker, GDAL
- **Gunnison Permit Portal | GitHub**
 - Developed a cloud-deployed permit-management application with authentication, database-backed records, and administrative workflows for a local-government use case.
- **Appraiser Photo Processor | GitHub**
 - Created an AI- and GPS-assisted workflow that organizes field appraisal photographs and reduces manual processing.
- **Private Local AI Workflows | GitHub**
 - Developed locally hosted LLM workflows for working with sensitive organizational data while maintaining data privacy.
