

Elissa Esterlein

Data Analyst | Property Assessment, GIS & Full-Stack Data Applications

Gunnison, CO · (970) 403-7694 · elissa.esterlein@gmail.com · github.com/Eesterlein · Tableau · Kaggle

PROFESSIONAL SUMMARY

Data analyst with 7+ years of experience turning large, messy datasets into accurate, decision-ready information. Currently supports statutory property-tax reporting for Gunnison County using SQL Server, Access, and GIS, and builds production web applications—interactive parcel maps, a permit portal, and AI-assisted tools—that put data in the hands of non-technical users. Completing Colorado assessor licensure coursework (RAEP).

CORE SKILLS

Data & Analysis	SQL (SQL Server/SSMS, PostgreSQL, Access), Python, R/RStudio, SAS, ETL, data validation & QA
Visualization & BI	Tableau, Power BI, Excel (advanced), interactive web dashboards
GIS & Spatial	PostGIS, GDAL, MapLibre GL JS, OGC APIs, shapefile/parcel geometry workflows
Development	JavaScript/TypeScript, React, Node.js/Express, HTML/CSS, REST APIs, Docker, nginx, AWS (EC2, RDS, S3), Git/GitHub
AI Tools	Claude API / vision classification, locally hosted LLM workflows for sensitive data
Domain	Ad valorem assessment, mass appraisal, Colorado certification of value & abstract reporting

PROFESSIONAL EXPERIENCE

Gunnison County Assessor’s Office — Data Analyst Gunnison, CO | Jul 2025 – Present

- Develop and optimize SQL queries in SQL Server Management Studio and Access to extract, transform, and deliver property and assessment data for appraisal staff and the public.
- Support production of state-mandated deliverables—valuations, tax rolls, abstracts of assessment, and certifications of value to ~42 taxing entities—through data processing and verification workflows.
- Perform data validation, QA, and integrity checks across large property datasets to ensure accuracy for statutory reporting and meet strict regulatory deadlines.
- Analyze real estate sales and property characteristic data to identify discrepancies, validate records, and support the appraisal process.
- Built public-facing dashboards and mapping tools (see Projects) that let staff and residents explore parcel, building, and land data without GIS software.

MedAware Systems — Data Analyst Boulder, CO (Remote) | Jan 2015 – Jan 2021

- Analyzed and interpreted medical literature and research data to inform clinical research tools used by client organizations.
- Designed search strategies and inclusion criteria that improved the precision and efficiency of database research.
- Maintained and validated key business datasets; monitored metrics, flagged changes, and recommended process improvements.
- Partnered with clients to define research needs, and presented findings to internal teams to build organizational knowledge.
- Performed data QA and handled public-facing communication for clinical research products.

SELECTED DATA & SOFTWARE PROJECTS

Gunnison County Assessor Map Platform

[Live App](#) · [GitHub](#)

- Built and deployed a full-stack GIS platform that lets non-technical users upload data, configure interactive maps, and join Excel/CSV records to parcel geometries—no GIS software required.
- Integrated wildfire detections refreshed every 30 minutes; built reusable layer-management, styling, and multi-map configuration tools.
- Deployed with Docker, nginx, and PostgreSQL/PostGIS, including firewall hardening and automated database backups.

[React](#) · [TypeScript](#) · [Node.js](#) · [MapLibre GL JS](#) · [PostgreSQL/PostGIS](#) · [OGC APIs](#) · [GDAL](#) · [Docker](#)

Gunnison Permit Portal

[GitHub](#)

- Developed a cloud-deployed building-permit search and staff administration portal covering four jurisdictions, with authentication, database-backed records, and document attachments.

[React](#) · [Tailwind](#) · [Node.js/Express](#) · [PostgreSQL/Prisma](#) · [JWT](#) · [AWS EC2](#), [RDS](#), [S3](#)

Building Stock & Land Attributes Dashboards

[Building Stock](#) · [Land Attributes](#)

- Published interactive dashboards analyzing 18,000+ county building records and parcel land attributes, with an automated GitHub Actions pipeline that rebuilds the data when new exports are uploaded.

[JavaScript](#) · [MapLibre GL JS](#) · [Python](#) · [GitHub Actions](#) · [GitHub Pages](#)

Appraiser Photo Processor

[GitHub](#)

- Created a desktop app that uses AI vision classification and GPS/EXIF metadata to sort, rename, and date-stamp field appraisal photos—about \$0.002 per photo—replacing manual processing; deployed to office staff on Windows.

[Python](#) · [Claude Vision API](#) · [PyInstaller](#)

Private Local AI Workflows

[GitHub](#)

- Developed locally hosted LLM workflows for analyzing sensitive organizational data without sending it to third-party services.

EDUCATION & CERTIFICATIONS

Western State Colorado University — *Bachelor of Arts, Biology*

[Gunnison, CO](#)

- **Colorado Assessor Licensure Track (RAEP):** Basic Appraisal Principles, Basic Appraisal Procedures, Introduction to Assessment, Ad Valorem Mass Appraisal, USPAP
- Google Data Analytics Professional Certificate
- Google AI Essentials Certificate
